Independent Auditors' Report on Review of Condensed Interim Financial Statements

To the Shareholders
Amlak International for Real Estate Finance Company
A Saudi Closed Joint Stock Company
Riyadh, Kingdom of Saudi Arabia

Introduction

We have reviewed the accompanying 31 March 2018 condensed interim financial statements of Amlak International for Real Estate Finance Company ("the Company"), which comprises:

- the condensed statement of financial position as at 31 March 2018;
- the condensed statement of profit or loss for the three-month period ended 31 March 2018;
- the condensed statement of comprehensive income for three-month period ended 31 March 2018;
- the condensed statement of changes in equity for the three-month period ended 31 March 2018;
- the condensed statement of cash flows for the three-month period ended 31 March 2018; and
- the notes to the condensed interim financial statements.

Management is responsible for the preparation and presentation of these condensed interim financial statements in accordance with IAS 34, 'Interim Financial Reporting' as modified by the Saudi Arabian Monetary Authority ("SAMA") for the accounting of zakat and income tax. Our responsibility is to express a conclusion on these condensed interim financial statements based on our review.

Scope of review

We conducted our review in accordance with the International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" that is endorsed in the Kingdom of Saudi Arabia. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

KPMG Al Fozan & Partners Certified Public Accountants, a registered company in the Kingdom of Saudi Arabia, and a non-partner member firm of the KPMG network of independent firms affiliated with KPMG International Cooperative, a Swiss entity.

KPMG

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying 31 March 2018 condensed interim financial statements of Amlak International for Real Estate Finance Company are not prepared, in all material respects, in accordance with IAS 34, 'Interim Financial Reporting' as modified by SAMA for the accounting of zakat and income tax.

1 THE COMPANY AND THE NATURE OF OPERATIONS

Amlak International for Real Estate Finance Company ("Amlak" or "the Company") is a Saudi Closed Joint Stock Company established and registered in the Kingdom of Saudi Arabia under commercial registration number 1010234356 in Riyadh dated 25 Jumada Awal 1428H (corresponding to 11 June 2007).

As per the revised commercial registration certificate of the Company dated 11 Ramadan 1435H (corresponding to 8 July 2014), the objectives of the Company are to provide real estate finance as per Saudi Arabian Monetary Authority ("SAMA") license dated 21 Safar 1435H (corresponding to 24 December 2013). As part of the new mortgage regulations, the Company is in the process of exiting from the investment related business.

The registered office of the Company is located at the King Saud Road, Riyadh, Kingdom of Saudi Arabia. The Company has the following branches:

Branch Commercial Registration Number	*Date*	*Location*
2050057816	30/12/1428	Khobar
4030171680	24/07/1428	Jeddah

2 BASIS OF PREPARATION

2.1 *Statement of compliance*

These condensed interim financial statements for the three-month period ended 31 March 2018 have been prepared in accordance with International Accounting Standard 34 "Interim Financial Reporting" as modified by SAMA for the accounting of zakat and income tax, which requires, adoption of all IFRSs as issued by the International Accounting Standards Board ("IASB") except for the application of International Accounting Standard (IAS) 12 - "Income Taxes" and IFRIC 21 - "Levies" so far as these relate to zakat and income tax. As per the SAMA Circular no. 381000074519 dated 11 April 2017 and subsequent amendments through certain clarifications relating to the accounting for zakat and income tax ("SAMA Circular"), the zakat and income tax are to be accrued on a quarterly basis through shareholders equity under retained earnings.

The condensed interim financial statements do not include all the information and disclosures required in the annual financial statements therefore, these should be read in conjunction with the Company's annual audited financial statements as at and for the year ended 31 December 2017.

2.2 *Basis of measurement*

These condensed interim financial statements have been prepared under the historical cost convention modified to include the measurement at fair value of investments at FVOCI and derivatives.

2.3 *Functional and presentation currency*

These condensed interim financial statements have been presented in Saudi Arabian Riyals (SR), as it is the functional currency of the Company. All financial information presented has been rounded-off to the SR in thousand.

3 IMPACT OF CHANGE IN ACCOUNTING POLICIES DUE TO ADOPTION OF NEW STANDARDS

Effective 1 January 2018, the Company has adopted IFRS 15 - Revenue from Contracts with Customers and IFRS 9 - Financial Instruments. Accounting policies for these new standards are disclosed in note 4 of these condensed interim financial statements. Significant judgments and estimates relating to IFRS 9 adoption are disclosed in the note 15 of these condensed interim financial statements. The impact of the adoption of these standards is explained below:

IFRS 15 Revenue from Contracts with Customers

IFRS 15 was issued in May 2014 and is effective for annual periods commencing on or after 1 January 2018. IFRS 15 outlines a single comprehensive model of accounting for revenue arising from contracts with customers and supersedes previously issued revenue guidance, which was found currently across several Standards and Interpretations within IFRS. It established a new five-step model that will apply to revenue arising from contracts with customers. Under IFRS 15, revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The adoption of this standard has no material impact on the Company's condensed interim financial statements.

IFRS 9 – Financial Instruments

The Company has adopted IFRS 9 - Financial Instruments issued in July 2014 with a date of initial application of 1 January 2018. The requirements of IFRS 9 represent a significant change from IAS 39 Financial Instruments: Recognition and Measurement. The new standard brings fundamental changes to the accounting for financial assets and to certain aspects of the accounting for financial liabilities.

As permitted by IFRS 9, the Company's has elected to continue to apply the hedge accounting requirements of IAS 39.

The key changes to the Company accounting policies resulting from its adoption of IFRS 9 are summarized below.

Classification of financial assets and financial liabilities

IFRS 9 contains three principal classification categories for financial assets: measured at amortized cost ("AC"), fair value through other comprehensive income ("FVOCI") and fair value through profit or loss ("FVTPL"). This classification is generally based, except equity instruments and derivatives, on the business model in which a financial asset is managed and its contractual cash flows. The standard eliminates the existing IAS 39 categories of held-to-maturity, loans and receivables and available-for-sale.

IFRS 9 largely retains the existing requirements in IAS 39 for the classification of financial liabilities. However, although under IAS 39 all fair value changes of liabilities designated under the fair value option were recognized in profit or loss, under IFRS 9 fair value changes are presented as follows:

- The amount of change in the fair value that is attributable to changes in the credit risk of the liability is presented in OCI; and
- The remaining amount of change in the fair value is presented in profit or loss.

For an explanation of how the Company classifies financial assets and liabilities under IFRS 9, see respective section of significant accounting policies.

3 IMPACT OF CHANGE IN ACCOUNTING POLICIES DUE TO ADOPTION OF NEW STANDARDS (CONTINUED)

Impairment of financial assets

IFRS 9 replaces the 'incurred loss' model in IAS 39 with an 'expected credit loss' model ("ECL"). IFRS 9 requires the Company to record an allowance for ECLs for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts (if any). The allowance is based on the ECLs associated with the probability of default in the next twelve months unless there has been a significant increase in credit risk since origination. If the financial asset meets the definition of purchased or originated credit impaired (POCI), the allowance is based on the change in the ECLs over the life of the asset. Under IFRS 9, credit losses are recognized earlier than under IAS 39. For an explanation of how the Company applies the impairment requirements of IFRS 9, see respective section of significant accounting policies.

Transition

Changes in accounting policies resulting from the adoption of IFRS 9 have been applied retrospectively, except as described below.

- Comparative periods have not been restated. A difference in the carrying amounts of financial assets and financial liabilities resulting from the adoption of IFRS 9 are recognized in retained earnings and reserves as at 1 January 2018. Accordingly, the information presented for 2017 does not reflect the requirements of IFRS 9 and therefore is not comparable to the information presented for 2018 under IFRS 9.

- The following assessments have been made on the basis of the facts and circumstances that existed at the date of initial application.

  i. The determination of the business model within which a financial asset is held.
  ii. The designation and revocation of previous designated financial assets and financial liabilities as measured at FVTPL.
  iii. The designation of certain investments in equity instruments not held for trading as FVOCI. For financial liabilities designated as at FVTPL, the determination of whether presenting the effects of changes in the financial liability's credit risk in OCI would create or enlarge an accounting mismatch in profit or loss.

It is assumed that the credit risk has not increased significantly for those debt securities which carry low credit risk at the date of initial application of IFRS 9.

3 IMPACT OF CHANGE IN ACCOUNTING POLICIES DUE TO ADOPTION OF NEW STANDARDS (CONTINUED)

a) Financial assets and financial liabilities

i) Classification of financial assets and financial liabilities on the date of initial application of IFRS 9

The following table shows the original measurement categories in accordance with IAS 39 and the new measurement categories under IFRS 9 of the Company's financial assets and financial liabilities as at 1 January 2018:

	Original classification under IAS 39	New classification under IFRS 9	Original carrying value under IAS 39	New carrying value under IFRS 9
			SAR in '000'	
Financial assets				
Cash and cash equivalents	Loans and receivables	Amortised cost	29,634	29,634
Equity investments	AFS	FVOCI	12,887	12,887
Murabaha receivables, net	Loans and receivables	Amortised cost	260,749	252,368
Ijara receivables, net	Loans and receivables ost	Amortised cost	2,744,421	2,714,053
Ijara mawsofa fi athemmah receivable, net	Loans and receivables	Amortised cost	116,696	117,639
Other assets	Loans and receivables	Amortised cost	9,835	9,835
			3,174,222	3,136,416
Financial liability				
Bank borrowings	Amortised cost	Amortised cost	2,072,175	2,072,175
Accrued expenses and other liabilities	Amortised cost	Amortised cost	21,637	21,637
			2,093,812	2,093,812

ii) Reconciliation of carrying amounts under IAS 39 to carrying amounts under IFRS 9 at the adoption of IFRS 9.

The following table reconciles the carrying amounts under IAS 39 to the carrying amounts under IFRS 9 on transition to IFRS 9 on 1 January 2018:

	IAS 39 carrying amount as at 31 December 2017	Reclassification	Re-measurement	IFRS 9 carrying amount as at 1 January 2018
		SAR in '000'		
Financial assets				
Murabaha receivables	260,749	--	(8,381)	252,368
Ijara receivables	2,744,421	--	(30,368)	2,714,053
Ijara mawsofa fi athemmah receivables	116,696	--	943	117,639
Available-for-sale investment	12,887	(12,887)	--	
Investment at FVOCI	--	12,887	--	12,887
Total financial assets	3,134,753	--	(37,806)	3,096,947

There have been no reclassification or re-measurement in case of other then above mentioned financial assets and financial liabilities of the Company upon adoption of IFRS 9 as at 1 January 2018.

3 IMPACT OF CHANGE IN ACCOUNTING POLICIES DUE TO ADOPTION OF NEW STANDARDS (CONTINUED)

iii) Impact on retained earnings and reserves

	Retained earnings	Unrealized gain on available-for-sale investment	Unrealized loss on investment at FVOCI

Accrued expenses and other liabilities	--	18,588	18,588
Total financial liabilities	--	**2,003,322**	**2,003,322**

4. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies, estimates and assumptions used in the preparation of these condensed interim financial statements are consistent with those used in the preparation of the annual financial statements for the year ended 31 December 2017 except for the policies explained below. Based on the adoption of new standards explained in note 3, the following accounting policies are applicable effective 1 January 2018 replacing / amending or adding to the corresponding accounting policies set out in annual audited financial statements for the year ended 31 December 2017.

A. Classification of financial assets

On initial recognition, a financial asset is classified as measured at: amortized cost, FVOCI or FVTPL.

Financial Asset at amortised cost

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding.

Financial Asset at FVOCI

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding.

FVOCI debt instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognised in OCI. Profit and foreign exchange gains and losses are recognised in profit or loss.

Equity Instruments: On initial recognition, for an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investment-by-investment basis.

Financial Asset at FVTPL

All other financial assets are classified as measured at FVTPL.

In addition, on initial recognition, the Company may irrevocably designate a financial asset, that otherwise meets the requirements to be measured at amortized cost or at FVOCI, as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets are not reclassified subsequent to their initial recognition, except in the period when the Company changes its business model for managing financial assets.

4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

A. Classification of financial assets (continued)

Business model assessment

The Company assess the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual profit revenue, maintaining a particular profit rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realizing cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated- e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Company's stated objective for managing the financial assets is achieved and how cash flows are realized.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Company's original expectations, the Company does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Financial assets that are held for trading and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

Assessments whether contractual cash flows are solely payments of principal and profit

For the purposes of this assessment, 'principal' is the fair value of the financial asset on initial recognition. 'Profit' is the consideration for the time value of money, the credit and other basic lending risk associated with the principal amount outstanding during a particular period and other basic lending costs (e.g. liquidity risk and administrative costs), along with profit margin.

In assessing whether the contractual cash flows are solely payments of principal and profit, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Company considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse asset arrangements); and
- features that modify consideration of the time value of money- e.g. periodical reset of profit rates.

4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

B. Classification of financial liablities

The Company classifies its financial liabilities, as measured at amortized cost. Amortized cost is calculated by taking into account any discount or premium to issue the funds, and other cost that are integral part of the effective profit rate.

Before 1 January 2018, all the financial liabilities were initially recognize at fair value less transaction costs. Subsequently financial liabilities were recognized at amortized cost

C. Derecognition

i. Financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognized) and the sum of

(i) the consideration received (including any new asset obtained less any new liability assumed); and
(ii) any cumulative gain or loss that had been recognized in OCI is recognized in profit or loss.

From 1 January 2018, any cumulative gain/loss recognized in OCI in respect of equity investment securities designated as at FVOCI is not recognized in profit or loss on derecognition of such securities. Any profit in transferred financial assets that qualify for derecognition that is created or retained by the Company is recognized as a separate asset or liability.

In transactions in which the Company neither retains nor transfers substantially all of the risks and rewards of ownership of a financial asset and it retains control over the asset, the Company continues to recognize the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

ii. Financial liabilities

The Company derecognizes a financial liability when its contractual obligations are discharged, cancelled, or expire.

D. Modifications of financial assets and financial liabilities

i. Financial assets

If the terms of a financial asset are modified, the Company evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognized and a new financial asset is recognized at fair value.

If the cash flows of the modified asset carried at amortized cost are not substantially different, then the modification does not result in derecognition of the financial asset. In this case, the Company recalculates the gross carrying amount of the financial asset and recognizes the amount arising from adjusting the gross carrying amount as a modification gain or loss in profit or loss. If such a modification is carried out because of financial difficulties of the borrower, then the gain or loss is presented together with impairment losses. In other cases, it is presented as profit.

4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

D. Modifications of financial assets and financial liabilities (continued)

ii. Financial Liabilities

The Company derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognized at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognized in profit or loss.

E. Impairment

The Company recognizes impairment allowance for ECL on the following financial instruments:

- Murabaha receivables;
- Ijara receivables; and
- Ijara mawsofa fi athemmah receivables

No impairment loss is recognized on equity investments.

The Company measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- debt investment securities that are determined to have low credit risk at the reporting date; and
- other financial instruments on which credit risk has not increased significantly since their initial recognition

The Company considers a debt security to have low credit risk when their credit risk rating is equivalent to the globally understood definition of 'investment grade'.

12-month ECL are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Measurement of ECL

ECL are a probability-weighted estimate of credit losses. They are measured as follows:

- financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive); and
- financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows;

Restructured financial assets

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognized and ECL are measured as follows:

- If the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset; and
- If the expected restructuring will result in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition .This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective profit rate of the existing financial assets.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

E. Impairment (continued)

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortized cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or past due event;
- the restructuring of a loan by the Company on terms that the Company would not consider otherwise;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganization; or
- the disappearance of an active market for a security because of financial difficulties.

A loan that has been renegotiated due to deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, a loan that is overdue for 90 days or more is considered impaired.

Presentation of allowance for ECL in the statement of financial position

Impairment allowances for ECL of financial assets measured at amortised cost are presented in the statement of financial position as a deduction from the gross carrying amount of the assets.

Write-off

Murabaha receivables, Ijara receivables and Ijara mawsofa fi athemmah receivables are written off (either partially or in full) when there is no realistic prospect of recovery. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to impairment charge for credit losses.

Collateral valuation

To mitigate its credit risks on financial assets, the Company seeks to use collateral, where possible. The collateral comes in various forms, such as financial guarantees and real estate. The Company accounting policy for collateral assigned to it through its lending arrangements under IFRS 9 is the same is it was under IAS 39. Collateral, unless repossessed, is not recorded on the Company statement of financial position. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed, at a minimum, at inception and re-assessed on a periodic basis.

To the extent possible, the Company uses active market data for valuing financial assets held as collateral. Non-financial collateral, such as real estate, is valued by independent valuers appointed by the Company.

4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

E. Impairment (continued)

Collateral repossessed

The Company accounting policy relating to collateral repossessed under IFRS 9 remains the same as it was under IAS 39. The Company policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the internal operations are transferred to their relevant asset category at the lower of their repossessed value or the carrying value of the original secured asset. Assets for which selling is determined to be a better option are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date in, line with the Company policy.

F. Income / expenses recognition

i. Income and expenses

Income from Murabaha, Ijara and Ijara mawsofa fi athemah contracts and borrowing costs are recognized in profit or loss using the effective profit method. The 'effective profit rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to or the amortized cost of the financial instrument.

When calculating the effective profit rate for financial instruments other than credit-impaired assets, the Company estimates future cash flows considering all contractual terms of the financial instrument, but not expected credit losses. For credit-impaired financial assets, a credit-adjusted effective profit rate is calculated using estimated future cash flows including expected credit losses.

The calculation of the effective profit rate includes transaction costs and fees and points paid or received that are an integral part of the effective profit rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

ii. Measurement of amortized cost and income

The 'amortized cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective profit method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance.

The 'gross carrying amount of a financial asset' is the amortized cost of a financial asset before adjusting for any expected credit loss allowance.

In calculating profit, the effective profit rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortized cost of the liability.

However, for financial assets that have become credit-impaired subsequent to initial recognition, profit is calculated by applying the effective profit rate to the amortized cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of profit reverts to the gross basis.

For financial assets that were credit-impaired on initial recognition, profit is calculated by applying the credit-adjusted effective profit rate to the amortized cost of the asset. The calculation of profit does not revert to a gross basis, even if the credit risk of the asset improves.

4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

G. Critical accounting judgements, estimates and assumptions

The preparation of the financial statements in conformity with IFRS requires the use of certain critical accounting judgements, estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. Such judgements, estimates, and assumptions are continually evaluated and are based on historical experience and other factors, including obtaining professional advices and expectations of future events that are believed to be reasonable under the circumstances. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period, or in the period of revision and in future periods if the revision affects both current and future periods. Significant areas where management has used estimates, assumption or exercised judgment are as follows:

- Impairment for Murabaha receivables;
- Impairment for Ijara receivables; and
- Impairment for Ijara mawsofa fi athemmah receivables.

5 MURABAHA RECEIVABLES, NET

	31March 2018 (Unaudited)	31 December 2017 (Audited)
Gross Murabaha receivables	**273,630**	296,843

8 INVESTMENTS IN JOINT VENTURES

The Company has joint control and ownership interest varying between 40% to 90% with different joint arrangements. The joint ventures (JVs) are structured as a separate vehicle and the Company has a residual interest in its net assets. Accordingly, the Company has classified its interest as a joint venture, which is equity-accounted. The Company does not consolidate the results of the JVs as it shares control and equal representation on the Board with the co-venturers.

No new investments in excess of original commitments have been made by the Company after 7 November 2014 to comply with the real estate financing laws. The existing portfolio will remain in the name of the Company till maturity and disbursements for commitments (as disclosed in note 19) in investments for ongoing operations will continue to be booked by the Company.

The Company has accounted for the joint ventures based on the latest available management accounts of the JVs. The financial statements of the JVs are prepared for the same reporting period as that of the Company, using consistent accounting policies except for revenue recognition.

In accordance with the agreements under which JVs are established, the Company and the co-ventures have agreed to make additional contributions in proportion to their interests to make up any losses, if required.

8 INVESTMENTS IN JOINT VENTURES (CONTINUED)

Movement of investment in Joint Ventures is as follows:

For the three-month period ended 31 March 2018 (Unaudited)	Location	% of shareholding	Opening balance	Additions	Share in net income	Withdrawals	Closing balance
a) Dar wa Emar, Olaya	AlOlaya, AlKhobar	50%	11,218	--	--	(6,465)	4,753
b) Dar wa Emar, Rahba	AlRahba, AlKhobar	90%	9,280	--	--	--	9,280
d) AbdulAziz Al Qassim, Malga III	Malga, Riyadh	40%	9,032	--	--	(1,461)	7,571
			29,530	--	--	(7,926)	21,604

For the year ended 31 December 2017 (Audited)	Location	% of shareholding	Opening balance	Additions	Share in net income	Withdrawals	Closing balance
a) Dar wa Emar, Olaya	AlOlaya, AlKhobar	50%	39,725	5,072	4,609	(38,188)	11,218
b) Dar wa Emar, Rahba	AlRahba, AlKhobar	90%	17,488	--	650	(8,858)	9,280

g) Saudi Kyan III	AlNawras, AlKhobar	60%	5,409	--	--	(5,409)	--
			112,824	52,230	8,911	(144,435)	29,530

9 ACCOUNT PAYABLES AND OTHER ACCRUALS

	31 March 2018 (Unaudited)	*31 December 2017 (Audited)*
Advances received from Murabaha and Ijara customers	**10,980**	7,820
Accrued expenses	**10,230**	7,932
Financing to customers (note 9.1)	**1,392**	28,073
Salaries and employee related expenses	**8,359**	13,705
Others	**10,691**	10,782
	41,652	68,312

9.1 Financing to customers arise when the financing arrangement has been agreed with the customer, but the amount is not disbursed due to a normal delay in the transfer of property.

10 ZAKAT AND INCOME TAX

The Company has submitted the tax / zakat declarations for the years ended 31 December 2007 through 2016 with the General Authority of Zakat and Income Tax ("GAZT"). Apart from the below, there has been no change in the assessments raised by the GAZT as disclosed in the Company's annual audited financial statements for the year ended 31 December 2017.

During the three-month period ended 31 March 2018, the Company has received a letter from GAZT assessing additional zakat and income tax of SR 151.2 million for the years from 2013 to 2016. In arriving at this figure, GAZT once again disallowed the deduction of net investment in finance lease from the Zakat base. The Company is in the process to contest this assessment through professional representation.

The Company considers it unlikely that the position of GAZT will be upheld, because the issue of deduction of net investment in finance leases has industry wide implications for leasing, mortgage finance business and any other finance related business where the main assets are receivables. Due to the uncertainties involved, the Company is unable to assess accurately the outcome of this matter and has not provided for any potential additional liability, which might arise from the assessment appeal and also from potential assessment of open years in these condensed interim financial statements.

11 BANK BORROWINGS

These represent amounts borrowed from local banks. These facilities carry borrowing costs at commercial rates of 3 months SIBOR plus spread with remaining maturities up to 5 years and are secured by the assignment of proceeds from instalment receivables. Under the terms of the borrowings arrangements, the Company has to adhere to certain financial and non-financial covenants. During the three-month period ended 31 March 2018 the Company was in compliance with all the covenants.

	31 March 2018 (Unaudited)	31 December 2017 (Unaudited)
Current portion of bank borrowings	**889,699**	861,375
Non-current portion of bank borrowings	**1,095,035**	1,210,800
	1,984,734	2,072,175

12 SHARE CAPITAL

As at 31 March 2018, the Company's authorised, issued and paid-up share capital was SR 903 million (31 December 2017: SR 903 million) divided into 90.3 million shares (31 December 2017: 90.3 million shares) with a nominal value of SR 10 each.

During the year 2017, in accordance with the approval in annual general meeting held on 16 May 2017, the Company issued 300,000 shares at par value to its employees as an incentive bonus.

13 EARNINGS PER SHARE

The basic and diluted earnings per share have been computed by dividing profit for the period by the weighted average numbers of share outstanding during the period,

	For the three-month period ended 31 March	
	2018	2017
Profit for the period	**24,826**	21,446
Weighted average number of ordinary shares (in thousands)	**90,300**	90,000
Basic and diluted earnings per share (SR)	**0.27**	0.24

14 GENERAL AND ADMINISTRATIVE EXPENSES

	For the three-month period ended 31 March	
	2018	2017
	(Unaudited)	
Salaries and employees related cost	**12,221**	11,782
IT expenses	**893**	943

16 RELATED PARTY TRANSACTIONS AND BALANCES

The related parties of the Company include the shareholders and their affiliated entities and certain key management personnel. In the ordinary course of its activities, the Company transacts business with its related parties on mutually agreed terms.

In addition to the related party transactions and balances disclosed elsewhere in these condensed interim financial statements, significant transactions and balances arising from transactions with related parties are as follows:

Nature of transactions	*Name of related party and relationship*	*Amounts of transactions* For the three-month period ended 31 March 2018 (Unaudited)	2017 (Audited)
Borrowing costs	The Saudi Investment Bank (shareholder)	**6,737**	8,619
Rent expense	Saudi Orix Leasing (affiliate)	**398**	398
Security and other expenses	Saudi Orix Leasing (affiliate)	**12**	11
Salaries and benefits	Key management personnel*	**2,603**	**2,739**
Board meeting fee and other expenses	Board members	**529**	812
Other income	Alistithmar Capital (affiliate)	--	250
Profit rate swap cost received	The Saudi Investment Bank (shareholder)	**48**	(32)

* Key Management Personnel represent the chief executive and his direct reports.

Nature of balances	*Names of related parties and Relationship*	*Balances* 31 March 2017 (Unaudited)	31 December 2017 (Audited)
Cash and cash equivalent	The Saudi Investment Bank (Shareholder)	**942**	25,408
Due from related parties	Alistithmar Capital (Joint venture)	**1,507**	1,507
	Dar Wa Emar - Olaya (Joint venture)	**7,033**	7,033
Bank borrowings	The Saudi Investment Bank (Shareholder)	**635,926**	596,117
Notional amount of Profit Rate Swaps (PRS)	The Saudi Investment Bank (Shareholder)	**50,000**	50,000
Financing and advances	Key management	**4,118**	3,241
Available-for-sale investment	SAIB Saraya Tower Real Estate Development Fund (Affiliates)	--	12,887
Investment at fair value through other comprehensive income	SAIB Saraya Tower Real Estate Development Fund (Affiliates)	**11,207**	--
Other receivables	Amlak International For Real Estate Development (Affiliates)	**1**	1
Prepaid rent	Saudi Orix Leasing (Affiliates)	--	398
Board meeting and other expenses payable	Board members	**2,146**	2,776

17 FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to the Company.

Financial instruments comprise financial asset, financial liabilities and derivatives.

Financial assets consist of bank balances, available-for-sale investment, investments at FVOCI, derivatives related profit swaps, murabaha, ijara, ijara mawsofa fi athemmah receivable and receivable from joint ventures. Financial liabilities consist of bank borrowings, payables and derivatives relates to profit rate swaps.

Fair value hierarchy

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

The following table shows the carrying amount and fair values of financial assets and financial liabilities where fair value is different from carrying value or where the financial assets and liabilities are recorded at fair value, including their levels in the fair value hierarchy.

31 March 2018		***Fair Value***			
	Carrying Value	***Level 1***	***Level 2***	***Level 3***	***Total***
Financial assets:					
Murabaha receivables, net	**245,247**	--	-	**213,571**	**213,571**
Investment at FVOCI	**12,100**	--	**12,100**	--	**12,100**
Positive fair value of derivatives	**1,279**	--	**1,279**	--	**1,279**
Financial liabilities:					
Negative fair value of derivatives	**432**	--	**432**	--	**432**

31 December 2017		*Fair Value*			
	Carrying Value	*Level 1*	*Level 2*	*Level 3*	*Total*
Financial assets:					
Murabaha receivables, net	263,522	--	--	224,611	224,611
Available-for-sale investment	12,887	--	12,887	--	12,887
Positive fair value of derivatives	1,046	--	1,046	--	1,046
Financial liabilities:					
Negative fair value of derivatives	666	--	666	--	666

17 FAIR VALUE OF FINANCIAL INSTRUMENTS (CONTINUED)

The valuation of murabaha receivables is estimated using contractual cash flows discounted at latest vairable yield, which is the contracted profit rate for recent transactions. Input into the discounted cash flow techniques includes Sauid Inter Bank Offer rates (SIBOR), contractual cash flows and primary origination spreads.

The fair value of ijara receivables, ijara mawsofa fi athemmah receivables and bank borrowings, is approximate to carrying amount as the entire financing portfolio and borrowings are floating rate.

There have been no transfers to and from Level 3 during the period.

18 CAPITAL ADEQUACY

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern and to maintain a strong capital base. Capital adequacy ratios as monitored and measured by the management below measure capital adequacy by comparing the Company's eligible capital with its condensed statement of financial position, commitments and notional amount of derivatives, if any, at a weighted amount determined by management to reflect their relative risk.

	31 March 2018 *(Unaudited)*		31 December 2017 *(Audited)*	
	Total capital ratio %	*Tier I capital ratio %*	*Total capital ratio %*	*Tier I capital ratio %*
Capital adequacy ratio	**44.83**	**44.83**	44.02	43.97

19 COMMITMENTS AND CONTINGENCIES

The Company has facilities approved but not utilised, indicative offers issued which are under consideration of the customers and due diligence in progress as of the reporting date which have the potential to convert into financing amounting to SR 328 million (31 December 2017: SR 287 million).

The Company has outstanding guarantee of SR 82.9 million (31 December 2017: SR 82.9 million) submitted in favour of GAZT for appeal by the Company.

The Company is committed to investment in joint venture projects amounting to SR 0.88 million (31 December 2017: SR 5.2 million).

20 FINANCIAL RISK MANAGEMENT

The Board of Directors is responsible for the overall risk management approach and for approving the risk management strategies and principles. The Board has appointed the Board Risk Management Committee, which has the responsibility to monitor the overall risk process within the Company.

The Risk Management Committee has the overall responsibility for the development of the risk strategy and implementing principles, frameworks, policies and limits.

The Risk Management Committee is responsible for managing risk decisions and monitoring on risk levels and reports on a quarterly basis to the Board Risk Management Committee.

20 FINANCIAL RISK MANAGEMENT (CONTINUED)

The Company manages exposure to credit risk, which is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Credit exposures arise principally in lending activities that lead to Murabaha, Ijara, Ijara mawsofa fi athemmah receivables.

The Company assesses the probability of default of counterparties using internal rating tools.

The Company attempts to control credit risk by monitoring credit exposures, limiting transactions with specific counterparties, and continually assessing the creditworthiness of counterparties. The Company's risk management policies are designed to identify, to set appropriate risk limits, and to monitor the risks and adherence to limits. Actual exposures against limits are monitored on regularly basis.

Concentrations of credit risk arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations of credit risk indicate the relative sensitivity of the Company's performance to developments affecting a particular industry or geographical location.

The Company seeks to manage its credit risk exposure through diversification of lending activities to ensure that there is no undue concentration of risks with individuals or groups of customers in specific locations or business.

Management monitors the market value of collateral obtained during its review of the adequacy of the impairment allowance for credit losses. The Company regularly reviews its risk management policies and systems to reflect changes in markets products and emerging best practice.

i. Credit quality analysis

a) The following table sets out information about the credit quality of financial assets measured at amortized cost as at 31 March 2018. Unless specifically indicated, for financial assets, the amounts in the table represent gross carrying amounts.

	12 month ECL		
Murabaha, Ijara, Ijara mawsofa fi athemmah receivables	**Stage 1 Gross carrying amounts**	**12 Month ECL**	**Stage 1 Net carrying amounts**
Investment grades	446,889	2,396	444,493
Non-investment grades	787,020	4,949	782,071
Unrated	826,582	1,665	824,917
Total	**2,060,491**	**9,010**	**2,051,481**

	Lifetime ECL (not credit impaired)		
Murabaha, Ijara, Ijara mawsofa fi athemmah receivables	**Stage 2 Gross carrying amounts**	**Lifetime ECL (not credit impaired)**	**Stage 2 Net carrying amounts**
Investment grades	82,061	1,183	80,878
Non-investment grades	253,611	5,520	248,091
Unrated	157,689	1,765	155,924
Total	**493,361**	**8,468**	**484,893**

20 FINANCIAL RISK MANAGEMENT (CONTINUED)

i. Credit quality analysis (continued)

Murabaha, Ijara, Ijara mawsofa fi athemmah receivables	Lifetime ECL (credit impaired)		
	Stage 3 Gross Carrying amounts	Lifetime ECL (credit impaired)	Stage 3 Net Carrying amounts
Investment grades	450	64	386
Non-investment grades	271,530	32,494	239,036
Non-performing grades	205,014	39,436	165,578
Unrated	28,776	446	28,330
Total	**505,770**	**72,440**	**433,330**

b. Amounts arising from ECL – Significant increase in credit risk

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and expert credit assessment.

The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- the 12 month probability of default (PD) as at the reporting date; with
- the 12 month probability of default (PD) at the time of initial recognition of the exposure

Credit risk grades

The Company allocates each exposure to a credit risk grade based on a variety of data that is determined to be predictive of the risk of default and applying experienced credit judgment. Credit risk grades are defined using qualitative and quantitative factors that are indicative of risk of default. These factors vary depending on the nature of the exposure and the type of borrower.

Credit risk grades are defined and calibrated such that the risk of default occurring increases exponentially as the credit risk deteriorates so, for example, the difference in risk of default between credit risk grades 1 and 2 is smaller than the difference between credit risk grades 2 and 3.

Each corporate exposure is allocated to a credit risk grade at initial recognition based on available information about the borrower. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade.

i) Generating the term structure of PD

Credit risk grades are a primary input into the determination of the term structure of PD for exposures. The Company collects performance and default information about its credit risk exposures separately for the corporate and retail portfolios.

The Company analyses the relationships between its historical default rates and macro-economic factors. For both the corporate and retail portfolios, the key macro-economic indicator is oil price. The Company has formulated a view of the future direction of relevant economic variables for three different scenarios.

20 FINANCIAL RISK MANAGEMENT (CONTINUED)

b. Amounts arising from ECL – Significant increase in credit risk (continued)

ii) Determining whether credit risk has increased significantly

The criteria for determining whether credit risk has increased significantly vary by portfolio and include quantitative changes in PDs and qualitative factors, including a backstop based on delinquency.

The credit risk of a particular exposure is deemed to have increased significantly since initial recognition if, the 12 month PD is determined to have increased by more than 0.5%.

Using its expert credit judgment and, where possible, relevant historical experience, the Company may determine that an exposure has undergone a significant increase in credit risk based on particular qualitative indicators that it considers are indicative of such and whose effect may not otherwise be fully reflected in its quantitative analysis on a timely basis.

For the corporate portfolio, apart from the increase in PD (rating downgrade) criteria, as a backstop, the Company considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due.

The Company monitors the effectiveness of the criteria used to identify significant increases in credit risk by regular reviews to confirm that:

- the criteria are capable of identifying significant increases in credit risk before an exposure is in default; and
- the criteria do not align with the point in time when an asset becomes 30 days past due;

iii) Modified financial assets

The contractual terms of a debt instrument may be modified for a number of reasons, including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the customer. An existing debt instrument whose terms have been modified may be derecognized and the renegotiated debt instrument recognized as a new debt instrument at fair value in accordance with the accounting policy.

When the terms of a financial asset are modified and the modification does not result in de-recognition, the determination of whether the asset's credit risk has increased significantly reflects comparison of:

- The risk of default at the reporting date (based on modified contractual terms); and
- The risk of default occurring at initial recognition (based on original, unmodified contractual terms)

If the modification results in derecognition, the determination of whether the asset's credit risk has increased significantly reflects a comparison of the following:

- risk of default at the reporting date (based on modified contractual terms); and
- the risk of default based on the modified terms.

The modified terms usually include extending the maturity, changing the timing of profit payments and amending the terms of debt instrument covenants. Both retail and corporate debt instrument are subject to modification

For financial assets, which are modified, the estimate of Probability of Default (PD) reflects whether the modification has improved or restored the Company's ability to collect profit and principal. As part of this process, the Company evaluates the borrower's payment performance against the modified contractual terms and considers various behavioral indicators.

20 FINANCIAL RISK MANAGEMENT (CONTINUED)

b. Amounts arising from ECL – Significant increase in credit risk (continued)

iii) Modified financial assets (continued)

Generally, a customer needs to demonstrate consistently good payment behavior over a period of time before the exposure is no longer considered to be credit-impaired / default or the risk of default is considered to have decreased such that the loss allowance reverts to being measured at an amount equal to 12-month ECL.

iv) Definition of 'Default'

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to Company in full,; or
- the borrower is past due more than 90 days on any material credit obligation to Company.

In assessing whether a borrower is in default the Company considers indicators that are:

- qualitative- e.g. breaches of covenant ;
- quantitative- e.g. overdue status and non-payment on another obligation of the same issuer to Company;

The definition of default largely aligns with that applied by Company for regulatory capital purposes.

vi) Measurement of ECL

The key inputs into the measurement of ECL are the following risk estimates:

i. probability of default (PD);
ii. loss given default (LGD); and
iii exposure at default (EAD).

PD estimates are estimates at a certain date, which are calculated, based on statistical rating models, and assessed using rating tools tailored for the corporate and high network individuals portfolio. These rating models are based on both quantitative and qualitative factors. If a counterparty or exposure migrates between ratings classes, then this will lead to a change in the estimate of the associated PD. Further the PD term structure is estimated considering the contractual maturities of exposures

LGD is the magnitude of the likely loss if there is a default. Company estimates LGD based on the history of recovery rates of claims against defaulted counterparties. LGD estimation considers the structure, any sale of collateral, and recovery costs of any collateral that is integral to the financial asset. Due to sparse historical defaults, the quantitative LGD estimates is adjusted for qualitative overlays based on Company's empirical loss experience.

EAD represents the expected exposure in the event of a default. Company derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract including amortization. The EAD of a financial asset is its gross carrying amount.

As described above, and subject to using a maximum of a 12-month PD for financial assets for which credit risk has not significantly increased, Company measures ECL considering the risk of default over the maximum contractual period over which it is exposed to credit risk, even if, for risk management purposes, Company considers a longer period. The maximum contractual period extends to the date at which Company has the right to require repayment of an advance or terminate a loan commitment or guarantee.

For portfolios in respect of which Company has limited historical data or depending on the materiality of portfolio, qualitative adjustment is used to supplement any internally available data.

20 FINANCIAL RISK MANAGEMENT (CONTINUED)

c. Loss allowance

The following table shows reconciliations from the opening to the closing balance of the loss allowance at an overall level.

Loss Allowance	12 Month ECL	Lifetime ECL (not credit impaired)	Lifetime ECL (credit impaired)	Total
Balance at 1 January, 2018	9,421	7,556	71,026	88,003
Transfer from 12 Month ECL	(207)	1,013	64	870
Transfer from Lifetime ECL (not credit impaired)	19	(164)	1,678	1,533
Net re-measurement of loss allowance	(511)	94	(328)	(745)
Murabaha, Ijara, Ijara mawsofa fi athemmah receivables that have been derecognized during the period	(40)	(71)	-	(111)
New Murabaha, Ijara, Ijara mawsofa fi athemmah receivables originated during the period	328	40	-	368
Balance at 31 March, 2018	**9,010**	**8,468**	**72,440**	**89,918**

d. Collateral

Company in the ordinary course of lending activities hold collaterals as security to mitigate credit risk in the Murabaha, Ijara, Ijara mawsofa fi athemmah receivables. These collaterals mostly include financial guarantees and real estate. The collaterals are managed against relevant exposures at their net realizable values. For financial assets that are credit impaired at the reporting period, quantitative information about the collateral held as security is needed to the extent that such collateral mitigates credit risk

21 SEGMENT INFORMATION

The Company objective is to provide financing for real estate leases in the Kingdom of Saudi Arabia. All assets, liabilities and operations as reflected in the statement of financial position and statement of comprehensive income belongs to the real estate financing segment.

For management purposes, the Company is organised into the following primary business segments:

Retail
These represents finance products granted to high net worth, small and medium sized businesses and individuals.

Corporate
These represents financing products granted to corporate and institutional customers. Investments in joint ventures are managed by the Corporate segment.

Head office
Head office is responsible for managing the surplus liquidity of the Company and provides support services to the business functions.

21 SEGMENT INFORMATION (CONTINUED)

The Company's total assets and liabilities at 31 March 2018 and 31 December 2017 and its total operating income, expenses and net income for the three-month periods ended 31 March 2018 and 2017 are as follows:

	Retail	Corporate	Head office	Total
2018				
Revenue for the three-month period ended 31 March	**36,714**	**29,676**	**--**	**66,390**
Expenses for the three-month period ended 31 March	**8,604**	**18,775**	**14,185**	**41,564**
Profit / (loss) for the three-month period ended 31 March	**28,110**	**10,901**	**(14,185)**	**24,826**
Total assets as at 31 March	**1,765,242**	**1,394,742**	**38,749**	**3,198,733**
Total liabilities as at 31 March	**1,095,288**	**901,818**	**47,442**	**2,044,548**
2017				
Revenue for the three-month period ended 31 March	36,421	31,864	--	68,285
Expenses for the three-month period ended 31 March	14,395	18,860	13,584	46,839
Profit / (loss) for the three-month period ended 31 March	22,026	13,004	(13,584)	21,446
Total assets as at 31 December	1,754,847	1,512,654	59,579	3,327,080
Total liabilities as at 31 December	1,104,028	1,004,040	49,716	2,157,784

22 APPROVAL OF THE CONDENSED INTERIM FINANCIAL STATEMENTS

The condensed interim financial statements have been approved by the Board of Directors on 7 Sha'aban 1439H (corresponding to 23 April 2018).
